## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6, 7, 9 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Morrison (3,486,505).

Morrison discloses an implant insertion instrument 10 comprising a housing 17, a pair of opposing guide members 11 coupled to the housing, a spreader 14 and a drive member 15 (see Figs. 1-5). The guide members include a planar guide surface and define an elongated slot 13 opening therebetween. An implant C is positionable between the guide surfaces. The spreader is positioned between the guide members. It includes a central body portion and opposite wings extending integrally therefrom (see Fig. 5, in which the wide lateral portions are being considered wings). A threaded drive shaft 15 is coupled to the spreader and engaged in a passage of the housing. A handle 20 is located at the proximal end of the drive member. The guide members include an abutment member adjacent a distal end thereof to limit penetration depth. The abutment member is orthogonal to a central axis of a guide member. On each guide, a support member 12 extends from the location of the abutment member and is positionable between vertebrae.

***Allowable Subject Matter***

Claims 20-40 are allowable over the prior art of record.

Claims 4, 5, 8 and 10-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
